REPORT

The Department of Information Technology is concerned with the technical skills being imparted to students and upgradation of skills to the faculty members.

In order to attain these goals the Department has organized One Day International Faculty Development Programme on 22.01.2022 with 715 participants which includes Professors from National and International Colleges and universities, Researchers from various Institutions. FDP is organized three sessions with various International Expertise.

The first session **Mr. Ruban Doss,** Quality Assurance Manager**,** Digital In-house Software Applications, Canada, delivered a Virtual Lecture on **"Internet of Things (IoT)"** between 9.30 AM And 10.30 AM. The Session gave the participants with concepts of Internet of Things and their applications.

The second session **Mr. Ramkarthik Manikandan**, Technology/Data Consultant & Azure Certified Data Scientists, Canada, delivered a Virtual Lecture on **"Machine Learning Theories and Use Cases".** It provides the participants a widespread research ideas in the field of Machine learning.

The Third session **Dr. Shameem Puthiya,** Research Associate, School of Computing Science, University of Glasgow, Glasgow, UK delivered a Virtual Lecture on **"Bandits For Recommendations".** He presented the participants with various angles of perception in the concept of recommenders.

Feedback form was collected from the participants for all three sessions which provided an overall excellent feedback.

WHAT IS IOT?
❖ Any sort of physical data that are/can be connected to internet
❖ Device that controls/collect/share data across internet with UID
(unique identifiers)
❖ As simple as from a light bulb Smart Phone/Car/Health Watch
❖ Auto Pilot Vehicles
❖ Home Security
❖ Industrial Security
❖ Centralized Navigation System
❖ Sensor Management etc

Supervised vs Unsupervised
Data is fed to the model/algorithm based on the Problem at hand.
Images are classified as Duck/No Duck (Labels) to train the model in Supervised Learning Example. New Images are predicted/classified based on the model.
In the Unsupervised Learning, the images are unknown, the algorithm itself is used to group the images into three clusters
Duck
Rabbit
Porcupine
Supervised Learning (Classification Algorithm)
Unsupervised Learning (Clustering Algorithm)
Western Digital

Introduction
Sequential Learning
Standard learning paradigm using historical data is called offline learning.
Many variants of offline learning like supervised, semi-supervised, unsupervised (classical and self-supervised) and domain adaptation.
In sequential learning, algorithm learns from the incoming sequence of data.
